	Political Quality	Pag. 1 of 3	
		Rev. 5	01/02/2013
		General Direction	

Eurospray's society was founded in 1987, operates in the field of metallic containers, in particular empty tin-plate aerosol cans;
The commercial part of the company is dedicated to the sales, to the supply of raw material and to the graphic design of the products;
The production is made out through automotive lines.

The company is now working in a context of high completion witch is always more directed to the search of the maximum price-cut of the realised products, sometimes scarifying quality, causing a constant changing of prices decided by the few companies witch supply the raw materials used by Eurospray.

As an answer to the risks caused by this situation, Eurospray's first aim is to be recognised has a qualified producer and supplier reliable over time, for a global and lasting client satisfaction, for what concerns the technical can characteristic and provided service, in particular, distribute, by efficient and innovative equipment and qualified suppliers, safe products, compliant to the industry laws and to the clients expectation.

Far more Eurospray's proposal is to improve and fortify his market position with a continuous development of billed and looking after the components quality sacrificing a short-term profit aiming to a long-term profit through technological and structural investments.

These targets can be achieved only through a constant check-up of the commercial prosecution and the productive process that has to be stable in time and has to give reproducible results – and a constant improvement of this and of the company structure.

In this field Eurospray has adapted the quality system required by UNI EN ISO 9001 witch has been integrated with the requirements for the food security established by Regg. CE n.1935/2004 and n.2023/2006 for products destined for alimentary contact.

Eurospray's direction has assumed precise commitments as soon as the requirement expressed by the clients and his expectations.

All the company members have the task and the responsibility to make sure that

		General Direction	

all that they do contributes to guarantee the quality level of the products and of the company.

Eurospray's quality system is subject to the periodical re-examination from the management to estimate the efficacy and the adequacy in regard to the company evolution and to the quality targets prefixed.

Eurospray's general direction assigns proper resources – regarding the equipment and staff opportunely trained – for the execution and the verification of all the activities that have an effect on the quality.

To guarantee the satisfaction of the requirement for the quality of the product, the customer complacency and the constant improvement, all the stages of production are constantly executed under control.

- Systematical re-examination of the contract to assure that the definition of the products to deliver is correct.
- Careful description of the modality of production and the product checkout.
- Use of machinery of a proper level and carefully maintained measuring stability and quality level of the product process.
- Definition of adequate targets and programs (ex. Optimisation of the traceability process) as well as the compliance of the legislation in force applicable in matter of workplace hygiene and supervision of material with alimentary destination.
- Use of instruments for précised controls adapted to the measures to carried out and opportunely calibrated.
- Selection of reliable suppliers, able to provide products and/or services of appropriate quality.
- Implements of corrective and preventive actions to avoid the recur of problems and improvement plans for a constant progress of the company performance.
- Measurements / check-up of the factors which affect on the clients satisfaction or dissatisfaction
